Hello,

My name is Anne-Marie. I am thirteen and have lived in North Vancouver my entire life. I am absolutely disgusted with the recent developments, especially the massacre on Keith Road.

There are at least five separate townhouses currently being built, and countless houses being destroyed to make way. What was once a lush skyline has been reduced to a sad reflection of Vancouver city. The new skyscraper is the ugliest thing I've ever seen and it makes my heart hurt to see lives being uprooted just so that we can have yet another "three bedroom, north facing, family friendly apartment" advertised over the newest construction site.

- "Proposed amendment to the zoning bylaw" who are we kidding this is already a lock.
- This council has rezoned and passed out development permits like candy on Halloween
- In doing so, densification has almost ruined our community of North Van/Deep Cove
- Over supply of multi-unit multi-family complexes has hurt my property value.
- Over crowding and lack of infrastructure in my community has hurt my quality of life
- I call for an immediate moratorium on development starting right now with this project
- I know this won't happen, therefore your all FIRED!
